

Switch On Workshops

Empower your leaders to create authentic change within your organisation. Actrua's Switch On Workshops provide the platform to build a high performing safety culture.

Switch On Workshops will challenge your people's current beliefs and behaviours about safety. Participants will be taken on an emotional and thought-provoking journey that goes beyond compliance to create a fundamental shift in their relationship to safety.

Workshops for Leaders and Crew

To activate and reinforce a positive culture of safety, we've designed our workshops at two specific levels.

Workshops for Leaders are recommended as the first phase, to ensure your leadership group is fully engaged with and able to support the Switch On strategies. Team Member workshops can then be deployed to your whole workforce, and can be co-facilitated with your internal leaders. This approach helps empower your leaders and build internal ownership of the program.

Switch On Workshops Will:

- Create a shared belief across your entire organisation that all incidents are preventable
- Facilitate visible felt leadership in HSEC
- Equip participants with the skills and expertise to positively influence others
- Provide participants with the confidence and techniques to intervene if they see an unsafe act or condition
- Encourage participants to recognise and acknowledge others when they see safe acts and conditions
- Increase awareness of hazard and near-miss situations and extend this awareness to the home and wider community
- Create individual and team safety action plans for your workplace

Switch On Workshops

Switch On Workshop Format

We're more than just trainers. We use a highly interactive and engaging format to challenge beliefs and inspire your people to put their learning into action.

Switch On Workshops run over two days with between 12 – 16 participants. We use a powerful combination of training and skill development, group discussions, team and outdoor activities, visual stimuli and individual learning. At the end of the workshops, we develop and record team action plans to be tracked for implementation.

Actrue Core 4 Model

The foundation for our Switch On Workshops is the Actrue Core 4 Model.

Day 1 – Switch On

Participants:

- Are challenged to confront unsafe behaviours in their environment that they been tolerating or excusing
- Learn simple but powerful techniques to Switch On, both at work and at home
- Identify why Safety Leadership is important for them
- Switch On to become personally accountable for making safe choices

Day 2 – Act on It

Participants:

- Are taken through a series of scenarios, video footage and role plays to develop the skills and techniques to have Courageous Conversations
- Take part in an outdoor activity that challenges their Safe to Start and their choices once pressure is applied
- Are empowered to act on it and create individual action plans they must implement at work and home.
